

ITT in Singapore

ITT Fluid Technology Asia Pte Ltd, the regional organization in Singapore, boasts a proud tradition of supplying quality pumping and valve products to the global industrial and biopharm markets.

For over 150 years, Goulds has been the dominant pump brand worldwide with over a million installed process pumps in service. Engineered Valves has been delivering high-quality valve solutions for over 50 years. In 1978, the Pure-Flo® valve line began as an extension of the Dia-Flo® diaphragm valve for high purity and hygienic applications.

The key product brands include Goulds Pumps®, A-C Pump, PRO Services®, PumpSmart®, ProSmart™, Fabri-Valve®, Dia-Flo®, Cam-Line®, Cam-Tite®, and Pure-Flo®.

ITT Fluid Technology Asia Pte Ltd is committed to providing innovative solutions to your fluid handling problems.

ITT Corporation (www.itt.com) is a multi-industry, global manufacturing company and world market leader in the fluid technology, defense electronics & services and motion & flow control industries. With headquarters in White Plains, New York, USA, the company employs approximately 44,000 worldwide.

ITT serves BioPharm in Singapore

Engineered for life

BioPharm in Singapore

The Pharmaceutical and Bioprocessing industries are among the fastest growing both globally and in Singapore. Rapid development in the biomedical sciences industry has propelled Singapore's manufacturing output by a significant 30.2% to \$23 billion in year 2006. Many top global Pharmaceutical and Bioprocessing companies have already made Singapore their base for regional manufacturing.

To serve these companies locally, ITT Corporation has a regional organization in Singapore. Our focus is to provide products and services needed by BioPharm firms to produce high quality drugs, vaccines and active pharmaceutical ingredients.

ITT Products for BioPharm

To meet the growth in the Pharmaceutical and Bioprocessing industries, ITT Pure-Flo, with over 50 years experience in the valves business, is well positioned to serve our customers.

ITT Pure-Flo offers high quality hygienic valves and process components. Through both standard and custom valve assemblies, ITT Pure-Flo is committed to helping the industry operate more effectively, efficiently and safely

Key Brands in Pharmaceutical and Biopharm markets:

Pure-Flo®:

- Manual & Actuated Hygienic Diaphragm Valves
- 2-Way Valves
- Modular Block Bodies
- Multi-Way Divert Valves
- Zero Static Valves (T-Valve, Upstream Sample and Downstream Purge Valves; Dual Inline Valves, Back-To-Back Valves)
- Integral Sterile Access and GMP (ISG) Valves
- Chromatography Valves

ITT also provides a family of proven Goulds® pumps and controls to meet the needs of the Pharmaceutical and Bioprocessing manufacturing plant operations. Key examples are:

- Model 3196/IC
- The 3196 (ANSI B73.1) and the IC (ISO 5199) pumps are heavy duty chemical process pumps designed for demanding applications with dependability and reliability in mind.
