

PRO Services® helps keep the power going.

If you need to maximize your power generation plant assets and improve your equipment reliability, you need to call PRO Services. We have expertise in all areas of mechanical and hydraulic design, metallurgy and the latest in manufacturing technology. We can help reduce your operating and maintenance costs and increase your mean time between failure (MTBF).

Call on us for a complete plant assessment, predictive analysis, scheduled maintenance programs, upgrades and re-engineering or to repair any brand or any type of rotating equipment. ISO certified PRO Service centers are located nation wide or worldwide. We're on call 24 hours a day—everyday.

For more information call **1-800-734-PUMP** or visit **www.ittproservices.com**.

PRO Services...we have the power to help.
