

*Replacement Parts for  
Industrial Pumps and  
Rotating Equipment*

ProCast

ITT Industries

Established in 1977, ProCast has established and maintained a reputation for providing the very highest quality foundry and machining services. The combined resources of the ProCast Team assures the fastest possible response to the needs of industrial customers worldwide, including capabilities to manufacture new replacement parts that often exceed O.E.M. standards.

ProCast has the resources, technology, personnel and the proven experience to quickly repair and to manufacture quality replacement parts for virtually any industrial rotating pump in service anywhere in the world today. ProCast provides technical assistance, raw castings, finished machine parts or total equipment and repair.

The ProCast Team controls all aspects of production to include reverse engineering, pattern making, casting, machining, quality control, and shipping.

## ***Capabilities:***

- Autocad Drawing system
- 12,000 Machine Drawings and 2100+ active patterns on file
- State-of-the-art coordinate measuring machine that produces a digital image of the part to be replicated at our main facility or at the customers site
- Quality controlled to ISO requirements
- Customized software facilitates E.D.I., guaranteed stock and inventory management
- Standard leadtimes are 4 weeks for cast parts and 2 weeks for turned parts
- Expedited overnight delivery available for emergency breakdowns
- 100% dimensional inspection is performed on all parts produced
- Satisfaction guaranteed or full refund
- Pick up and delivery to or from virtually any location

## ***Foundry***

Superior metallurgical technology combines with advanced techniques to produce quality sand castings for virtually any machined component.

- Castings of up to 2,500 lbs (1,133kg)
- Alloy Steel, Nickel Alloy, or Carbon Steel
- Electric Induction Furnaces
- Solid State Vacuum Spectrometer to ensure casting compositions
- Metallurgical Engineer on staff for material specifications
- Thousands of patterns crafted of wood and metal
- New or replacement patterns can be replicated from a sample part or engineered pattern drawings

## ***Precision Machining***

Our well-staffed machine shop is dedicated to producing exact tolerance machine parts using the latest state-of-the-art machine tool technology.

- CNC equipment achieves machining accuracy of  $<.001/in.$  (0.0254 mm)
- Capability to replicate from original parts using digital technology
- Computer controlled Mazak lathe and horizontal machining center
- Experienced staff skilled in state-of-the-art production procedures

- Ring, Imp. Wear
- Ring, Lantern
- Rotor
- Screw
- Shaft
- Shearpeller
- Sideplate
- Sideplate, Disch.
- Sideplate, S.B.
- Sideplate, Suction
- Washer
- Wheel

## ORDER PARTS ON-LINE www.procastparts.com

- Order your replacement pump parts on the Internet “anywhere...anytime!”
- Special promotions and discounts
- Extensive searchable catalog
- User-friendly navigation with simple shopping cart functionality
- Credit card purchases accepted
- Online order status and history
- Customer email notifications
- Contact ProCast to learn more or check us out at [www.procastparts.com](http://www.procastparts.com)!
