

Somewhere out there  
a pump is about to fail.  
Want a heads-up?

Think about ITT.

**Introducing the Goulds 3196 i-FRAME™.**

Now every Goulds 3196 features onboard intelligence that continuously monitors vibration and temperature at the thrust bearing. Flashing lights alert you to any problems so that changes to the process or machine can be made before failure occurs. Further enhancements in bearing technology, oil sump design, and bearing isolators provide years of worry-free operation. Now standard truly is deluxe. To download a product brochure, visit [gouldspumps.com](http://gouldspumps.com), or call 1-800-734-7867.

Goulds Pumps
